The statistics provided here include all incidents alleged to have occurred onboard Norwegian Cruise Line's vessels worldwide, even if such allegations are later determined to be unfounded (i.e., false or baseless). When providing/using law enforcement agency statistics on land, the FBI cautions and, in fact, strongly discourages, data users against using rankings based on allegations alone.

Notes:

1 Crime categories derived from those listed in the U.S. federal *Cruise Vessel Security and Safety Act of 2010. C* hart includes alleged incidents on all voyages regardless of itinerary.

2 Crew capacity on all ships combined. Passenger and crew totals are approximate.

3 Excludes overboard incidents where the individual was recovered.

4 The Uniform Crime Reports (UCR) are published annually by the FBI and contain statistics regarding land-based crimes in designated categories reported to law enforcement agencies across the United States. The UCR's rates nationwide for alleged violent crimes per 100,000 persons during the years 2012 through 2014 (based on 2014 Preliminary Report) in the following categories were: Rape - 24.7; Aggravated Assault - 236.7; and Homicide - 4.6. The rates per 100,000 in these categories in the cruise industry, reported by the Cruise Lines International Association for 2012 through 2014, were: Rape - 8.6; Assault with Serious Bodily Injury - 3.4; and Homicide - 0. Details concerning rates of crime in the cruise industry can be found at http://www.cruising.org/regulatory/comparison-alleged-violent-crimes-rates-sea-and-shore.
